

The Power Of Nature at Work!

Citrus Fruit, man's very first cleaning product. Its cleaning power is d'limonene which is contained in the peel and seeds of the orange.

ORANGE aPEEL distills the raw material fully to recover the d'limonene from the orange peel leaving no oily residue. The process enhances the emulsification properties while enabling d'limonene to be mixed with water. The end result, ORANGE aPEEL is a natural Organic product, environmentally friendly and biodegradable, yet a powerful formulation. d'limonene in the natural environment is degraded in a relatively short period of time.

Emulsification is a natural process that breaks down the molecular structure of a foreign substance and suspends the molecules within the emulsifier. The stain disappears. ORANGE aPEEL leaves no stain and will not harm fabric, even silk! Today, virtually all dyes are chemical dyes and will not be affected by ORANGE aPEEL. To be absolutely safe, test the cleaner on a section of fabric/carpet that will not be seen.

ORANGE aPEEL is the most effective, economical cleaner and stain remover on the market. The versatility of ORANGE aPEEL is what puts this premium product in a class of its own. It is economical because it comes in a super concentrate which can be mixed with water to the desired concentration needed for the cleaning task at hand. A 500ml bottle of ORANGE aPEEL makes 6 Imp. gallons (approx. 33 710 ml spray bottles) of general mix cleaner.

d'limonene has proven to be much more than just an effective emulsifier. In a diluted form, ORANGE aPEEL can be used on silk plants. In a concentrated form it can remove difficult stains such as permanent felt pen markings from a wall or a wine stain from a favorite arm chair.

ORANGE aPEEL is an excellent spot and stain remover, odour destroyer and natural all purpose cleaner, as well as an air freshener

ORANGE aPEEL is very economical:

- 472 ml makes 6 gallons of General Use mix.
- 1.89 Litre makes 24 gallons of General Use mix.

Additional Applications: See inside page of brochure

Mist Mix: Chrome & Vinyl - Shining & Dusting - Silk Plants.

General Mix: Canvas & Tarps - Removes Body Oils from Hot Tub or Spa - Golf Ball cleaner - Flood & Fire restoration cleanup - Janitorial Cleaning

Strong Mix: Grease, Oil, etc. - Printing Machines - removes Stains from Road Salt & De-icing Chemicals in Carpets - stop "cribbing" in Horse Stalls and cleans all Tack/ Saddles/Hoof Black - removes Wall Paper once it is scored - degrease Engines & Pads - takes Oil off Driveways - Pitch off Saw Blades, etc.

Next-To-Impossible Cleaning Problems:

- Wax crayon, candle wax, blood, wine, permanent felt pen, gum, chocolate, tar, tree sap, fingernail polish, decals & price stickers, most glues/silicones & other adhesives, paints & stains, etc. on walls and carpets. Use full strength ORANGE aPEEL, rub in and let sit 5 minutes. If working with very thick substance, be patient. Add more ORANGE aPEEL and allow more time to emulsify. Once problem substance is dissolved add water to rinse off.
- Rust & Rust Stains - 1:1 dilution with water. Use stiff brush.
- Graffiti - 1:1 dilution with water. Rough surfaces would require a brush.
- Marine (general) - 1:10 dilution to clean oily water separators filters. 1:20 for slop hoses so hoses can be reused. 1:50 dilution for general purpose cleaning.

Orange a·P·E·E·L

The Organic Cleaning Solution

CARPET CLEANING: Use general mix (see Mixing Chart) for cleaning carpets & upholstery. Use warm, not hot water. For stubborn stains and heavy traffic areas, pre-spray with strong mix, work in, allow 15 minutes to emulsify, then shampoo with general mix and rinse with water (rinse steamer/shampoo machine after use). For spot remover, spray on general mix, work into stain, let sit, blot out with absorbent cloth. Rinse and blot again. Repeat if necessary using stronger mix for stubborn stains. To remove gum, tar, candle wax, fingernail polish, etc. soak with concentrate and agitate. Let sit and reapply if necessary. Once grime is emulsified, add water to rinse clean. NOTE: it is important to extract the ORANGE aPEEL from the carpet or fabric in order to remove the stain with it, otherwise the stain may reset. Always rinse with clean water.

CLOTHING STAINS: Pre-spray stains with general to strong mix. Let stand 15 minutes then wash in regular wash cycle, if necessary repeat using concentrate (test colour fastness). For heavily soiled work clothes or strong odors, add 1-2 Tbsp ORANGE aPEEL to wash cycle. Agitate for 5 minutes, shut off cycle and soak (overnight if necessary). Complete cycle after soaking.

KITCHENS & BATHROOMS: Spray on general mix. Allow to stand for 3-5 minutes and wipe off. If general mix doesn't cut hard water build-up or heavy burn-ons, spray again and sprinkle with baking soda and rub with cloth or nylon scouring pad. Great for stoves, sinks, counters, tubs, showers, light fixtures, etc. For Toilets add 10 ml ORANGE aPEEL and 50 ml Vinegar to bowl. Swish in and let sit 20-30 minutes. Wipe down with toilet brush and flush.

WALLS & FLOORS: 2 tsp. per gallon (up to general mix) warm water, no need to rinse. Safe to use on hardwoods, tiles, linoleum, ceramic, etc. To strip wax, use 1 part ORANGE aPEEL to 1 part water. Agitate with a brush.

WINDOWS & MIRRORS: Spray with mist mix of ORANGE aPEEL, then wipe off and shine with a soft cloth. If streaks appear, solution is too strong.

OVENS, BARBEQUES, FIREPLACES: Use strong mix let stand 15-30 minutes. Wipe clean. For heavy burn-ons, spray again and sprinkle with baking soda, agitate with brush or nylon scouring pad. Rinse clean, soak racks in 2 tbsp. ORANGE aPEEL and water to cover in porcelain or metal tub (not fiberglass). Heavy build-up will require longer soaking.

GARDEN: Spray mist mix indoors or outdoors on plants, trees, shrubs and surrounding areas. Cleans silk plants.

AIR CLEANER: Spray diluted ORANGE aPEEL to deodorize and clean the air. Removes cigar, pet odours, diesel, propane sick rooms, gyms, etc. The general mix is strong enough to remove skunk odours.

ADHESIVES, DECALS & LABELS: Spray on straight. Allow time to emulsify. Wipe / scrape off. Do not use full strength on plastic.

DRAINS & GREASE TRAPS: Pour straight ORANGE aPEEL concentrate into drain. Allow to sit 30 minutes then pour in hot water. For grease traps use 5 tbsp daily or as required for larger areas.

FIRE & FLOOD: Clean with general to strong mix to remove soot smoke, sewer and musty odours. Use shampooer for carpet & upholstery.

INDUSTRIAL: Use ORANGE aPEEL full strength or in a strong mix to remove tar, tree sap, adhesive and decals, glues, grease and oil, etc. Use for cleaning work areas, concrete or file floors, tools, large or small equipment & machinery. Cleans pitch from saw blades. Can be used in pressure sprayers (rinse machine after use). Pre-soaking often beneficial.

BOATS, BIKES, ATVs & RVs: Use general to strong mix to remove mold, mildew, algae, oil, grease, corrosion, scuff marks, etc.. Remove grease and oil from bike chains and cables. Use in RV holding tanks, outdoor toilets, septic tanks. For RV tank-after draining waste, flush with water then add 1 oz. in 1/2 gallon of water to keep tank fresh while not in use and ready for next outing. Just add more ORANGE aPEEL if odours become noticeable (no need to use chemical products for odour control). Larger tanks will require more ORANGE aPEEL. (see "Caution" on fibreglass and Plexiglas®).

AUTOMOTIVE: Use for cleaning interior and exterior, motors, parts cleaning. Use strong mix to remove grease & oil, bugs and bird droppings. Use full strength to remove road tar, tree sap, gum and clean white walls on tires. To shine chrome, use light mist mix. Always carry ORANGE aPEEL as air cleaner.

OUTDOOR SPORTS & SPORTING EQUIPMENT: General mix removes fish oil, dried blood. Spray mix on tent, sleeping bags and eating area (spray cloth to cover food). Removes odour & grime from hockey and other sporting equipment when soaked and washed in ORANGE aPEEL. Make footwear odour free.

PAINTING TOOLS: Soak in strong mix then rinse. Clean up paint & stain spills, wipe unwanted paint off your hands, hair, etc. (avoid eyes and sensitive skin). Use to remove paint off your clothes.

PETS: Use general mix to clean litter boxes, cages, kennels, dog runs, stables (& tack), aquariums, etc. Use to clean pet stains (see :Carpet Cleaning"). Will remove cat spray. Do not use on your animal.

Mixing Chart

Strong Mix	2-4 tbsp/710ml spray bottle	OR	90ml per 4L (30-60ml/L)
General Use	1 tbsp/710ml spray bottle	OR	60ml per 4L (15ml/L)
Light Mix	1 tsp/710ml spray bottle	OR	30ml per 4L (7.5ml/L)
Mist	1/2 tsp/710ml spray bottle	OR	15 ml per 4L (4ml/L)

USE CAUTION IF USING ORANGE aPEEL IN CONCENTRATED FORM

Note: Add Orange aPEEL to Water. Shake before each use. Adjust mixes and soaking (emulsifying) time according to use. Conversions: 1 tsp. = 5 ml. 3 tsp. = 1 tbsp. 2 tbsp. = 1 oz. 8 oz. = 1 cup 1 cup = 250 ml 4 cups = 1 Litre

*Sizes are approximate. For convenience, use 710 ml (3 cup) ORANGE aPEEL Spray Bottle used.

Note: Shake before each use. Adjust mixes and soaking (emulsifying) time according to use.

IMPORTANT FACTS:

Organic Product

Always allow time to emulsify. ORANGE aPEEL does do the job! If you do not achieve the desired result repeat the application (use stronger mix when necessary and soak longer). Call our toll free number for more information.

It is important to extract the Orange aPEEL from carpet or fabric after use in order to remove the stain with it (otherwise the stain may reset). Remove by rinsing with water & blotting with absorbent cloth.

ORANGE aPEEL is not a poison. If excessive amounts are taken, drink large quantities of water and consult physician. In case of allergic reaction, use rubber gloves or mask.

Add ORANGE aPEEL to water. (NOT water to ORANGE aPEEL).

Cautions:

- Always use caution if using ORANGE aPEEL in concentrated form. Especially use caution on plastics, fibreglass, Plexiglass, painted and varnished surfaces. Always do a test spot.
- Keep away from eyes and sensitive skin.
- If allergic to citrus, wear rubber gloves.
- Do not spray concentrate near open flame.
- ORANGE aPEEL is not responsible for misuse.
